

Our Assurance Is Our Business Continuity

Business Continuity Policy

As one of the leaders in the global flat-rolled aluminium industry, Assan Alüminyum establishes, applies, and continuously improves Business Continuity Management System in accordance with the ISO 22301 standard and the Kibar Holding Business Continuity Policy, in order to continue to continuously and effectively offer the product and services that fall within the extent of its core activities.

We commit to apply the following principles, without compromising our corporate reputation, our social responsibility awareness, our environmental awareness, our prioritization of human life and our values:

- To manage the risks associated with business continuity, which have been previously identified to reduce effects of the potential interruptions to a bare minimum,
- To maintain the integrity of corporate functions in case of business interruptions,
- To reduce the financial, operational, legal, and reputation-related effects of business interruptions to an acceptable level,
- To maintain a correct internal and external communication flow by conducting an effective decision-making process in case of business interruption
- After a business interruption, to get back to regular working conditions in the most efficient and effective way and in order to maintain business continuity previously identify critical activities, and to generate the plans and procedures,
- To reduce the periods of interruptions to a minimum level, from company, customer, supplier, and other stakeholders' perspectives.
- To comply with all applicable national and international compliance obligations.
